SUGGESTED BRIEF CITATION

U. S. Bureau of the Census, United States Import Statistics, Report FT 110, September, 1960. Washington 25, D. C. December, 1960.

For sale by the Superintendent of Documents, U. S. Government Printing Office, Washington 25, D. C. and Department of Commerce Field Offices. Price 40 cents (single copy). Subscription price: $4; $1.25 additional for foreign mailing.

GENERAL EXPLANATION

COVERAGE

The import statistics include government as well as non-government shipments of merchandise from foreign countries to the United States. However, American goods returned by the United States armed forces for their own use are excluded. Shipments into the United States from Puerto Rico and from the United States territories and possessions and shipments between the territories and possessions and between Puerto Rico and the territories and possessions are not reported as United States imports, but imports into Puerto Rico from foreign countries are considered to be United States imports and are included in this report. Merchandise shipped under Customs custody through the United States in transit from one foreign country to another is not reported as imports. In general, the import statistics are a complete record of the physical movement of merchandise into the United States from foreign countries (except for intransit shipments), but there are some exclusions of items of relatively small importance in terms of total value such as gifts valued at less than $100.

Imports for consumption shown in this report consist of merchandise entered into United States consumption channels, i.e., merchandise released from Customs custody immediately upon arrival, merchandise entered into bonded manufacturing warehouses (other than smelting and refining warehouses), merchandise withdrawn from bonded storage warehouse for release into domestic consumption channels, and imported ores and crude metals which have been processed in bonded smelting warehouse.

RELATED INFORMATION

Information is also compiled for general imports, which represent total arrivals of imported goods (except for in-transit shipments), i.e., merchandise released from Customs custody immediately upon arrival plus merchandise entered into bonded storage warehouse, bonded manufacturing warehouse, and bonded smelting and refining warehouse immediately upon arrival. General import figures covering total trade, country totals and Customs district totals are published monthly. General import commodity statistics are not published but are available for reference purposes.

Trade between the United States, Puerto Rico and United States possessions (not included as United States imports) is presented separately in Report No. FT 800. Statistics on the movement of in-transit merchandise arriving at or leaving the United States by vessel (not included in this report) are also compiled and presented in summary form in Report No. FT 985. In addition, transportation statistics (showing shipping weight as well as value information) are compiled covering that part of general imports of merchandise which arrives by vessel. Summary vessel transportation statistics for both imports and exports are presented in Report No. FT 985. A more complete description of the coverage and presentation of these separate shipping statistics will be found in the introduction to that report.

SOURCE OF INFORMATION

The source of information for all of the imports included in this report is the import entry (various Customs forms), which importers are required to file with Collectors of Customs for each shipment arriving in the United States. Importers are instructed to report value and country of origin information in accordance with the definitions given below.

VALUATION

The dollar value which should be shown on the import statistics is defined generally as the market value in the foreign country and should exclude the United States import duties, ocean freight and marine insurance. In actual practice only the values reported for imports subject to an ad valorem rate of duty (a percentage of the value) will tend to conform precisely to the vaulation definition. Imports subject to an ad valorem rate of duty account for only 10-15 percent of the total value of imports. For merchandise not subject to an ad valorem rate of duty (85-90 percent of imports), the reported values may not be in accordance with the above definition. For example, ocean freight may be inadvertently included in the values, values for shipments between allied firms may reflect arbitrary values, etc.

COMMODITY INFORMATION

Commodity information is summarized according to the classifications established in Schedule A, Statistical Classification of Commodities Imported into the United States, and is presented in the order of the numbered classifications in that Schedule. The Imports of Merchandise for Consumption by Subgroup table on page 7 of this report indicates the range of Schedule A commodity numbers covering related subgroups of commodities and will assist in locating in the report the statistics for particular commodities. For precise definition of the individual commodity classifications for which figures are presented, reference should be made to Schedule A. The commodity descriptions in this report are necessarily abbreviated to save printing costs and therefore, in many cases, they do not contain all of the qualifying information necessary to define clearly the commodity for which statistics are shown. The omission of a Schedule A commodity classification from this report indicates no imports of that commodity valued at more than $100 reported on formal entries. (See Section a of the "Explanation of the Sampling Procedure..." which follows this General Explanation.)

There are substantial difficulties to be faced in obtaining correct commodity classifications. While the more obvious errors in the statistical classifications of commodities by importers may be found during the processing of the statistics, a number of errors may go undetected, especially if the description of the merchandise shown on the entry is too general to specifically identify the proper commodity classification yet does not appear to be in contradiction with the commodity classification number assigned by the importer.

Effective January 1960, the initial reporting of imports is in terms of the 8-digit commodity classifications contained in United States Import Duties Annotated for Statistical Reporting. This publication presents the statistical reporting requirements as well as the tariff requirements in one volume in arrangement of the tariff paragraphs. The U.S.I.D. Annotated attempts to eliminate errors in initial reporting (and in the import statistics) occasioned by the difficulty of cross-classification between the tariff and statistical reporting requirements heretofore in different publications and in different arrangements.

COUNTRY OF ORIGIN

Though the country which should be reported in the statistics as the country of origin is defined as the country where the merchandise was grown, mined, or manufactured, the country actually shown in the statistics may in a number of cases represent some other country, such as the country of purchase, lading, or the country in which mixed lots of various origin are consolidated. This is particularly true of goods received from, but not originating in, merchanting or transshipment countries such as Hong Kong, Singapore, Netherlands, Belgium, etc.; in such cases the statistics may credit the shipments to such countries rather than the country of origin as defined. It follows, therefore, that imports from such merchanting or transshipment countries are likely to be overstated and imports from other countries correspondingly understated. Where it is known that a country is not the country of origin, the country of shipment is shown and footnoted in this report.

The geographic definition of countries reported are shown in Schedule C, Classification of Country Designations Used in Compiling the United States Foreign Trade Statistics. Country names which are abbreviated in this report to save space are shown in full in Schedule C, together with descriptions of the countries, adjacent provinces, territories, islands, or other areas considered a part of the country for statistical purposes. Schedule C is published as a part of Schedule A (see "Commodity Information" above). A separate edition of Schedule C is also available free upon request to the Bureau of the Census.

To save printing costs complete commodity by country of origin information is not shown in the monthly issues of this report. For each Schedule A commodity number, separate country of origin information is shown only for countries from which imports during the period covered by the report were $10,000 or more. Imports of that commodity originating in countries from which the amount shipped was less than $10,000 are presented as a combined total without country of origin detail and identified as "OTH CTY" (other countries). Information on imports originating in countries from which the amount shipped was less than $10,000 can be supplied upon request. A charge may be made to cover the cost of preparing this detailed information.

Countries are listed for each commodity in this report according to continents, in sequence within each continent from north to south and west to east, in accordance with Schedule C. The omission of a country name indicates no imports of that commodity from that country or imports of less than $10,000.

REVISIONS TO PREVIOUS MONTHS' REPORTS

Significant revisions to data published in this report for earlier months of the current and previous year are shown periodically at the back of this report. With the exception of very important changes, any revisions to data for earlier years are held for reflection in the figures to be published in Foreign Commerce and Navigation of the United States for that year.

SOURCES OF FURTHER INFORMATION ABOUT IMPORT STATISTICS

A complete discussion of the compilation procedures and coverage for import statistics will be found in the Foreword to the latest edition of Foreign Commerce and Navigation of the United States. (Copies are available for reference at public libraries.) Regular subscribers to FT reports are automatically supplied with copies of Foreign Trade Statistics Notes, a monthly publication containing information of value to users of foreign trade statistics (such as, changes in type of shipments covered by current statistics, unusual shipments, problems of valuation, classification, etc.). A catalog of United States Foreign Trade Statistical Publications is also available. Data in this report are available for reference purposes prior to the publication of the report or may be obtained in advance of publication on payment of the cost for a special report. Reports providing additional detail compiled but not published can be obtained on a cost basis. For free copies of the catalog or for further information regarding reference copies of tabulations or the availability of special reports, request should be made to the Bureau of the Census.

SPECIAL NOTICE

NEW AND RE-INSTATED SCHEDULE A COMMODITY CLASSIFICATIONS

Beginning September 23, 1960, cotton typewriter-ribbon cloth imported under the provisions of Tariff paragraphs 904(a), 904(b), and 904(c) is dutiable at the 1930 rates. (See Presidential Proclamation entitled, "Modification of Trade Agreement Concessions on Cotton Typewriter-ribbon Cloth," dated August 23, 1960.) Shown below are the new Schedule A commodity classifications which were established for reporting information on imports of these fabrics beginning September 1960.

Schedule A commodity number	Commodity description and unit of quantity
	Cotton typewriter-ribbon cloth - Square yards and pounds
	Not bleached, dyed, printed or colored:
3048 770	Carded (formerly part of 3048 900)
3048 790	Combed (formerly part of 3048 950)
	Bleached:
3058 770	Carded (formerly part of 3058 900)
3058 790	Combed (formerly part of 3058 950)
	Printed, dyed or colored:
3068 770	Carded (formerly part of 3068 800 and 3068 900)
3068 790	Combed (formerly part of 3068 850 and 3068 950)

Any data shown under the foregoing classifications for September 1960 include only those imports entered on or after September 23.

In addition to the foregoing, the following commodity classifications have been established or reinstated because of Tariff changes made in recent Public Laws and Presidential Proclamations:

1379 200	Coconut meat, fresh or frozen, and shredded or grated (from 1250 900) - pound
	Table and bureau covers, center pieces, etc., of plain-woven cotton cloth
3083 700	Block-printed by hand (not in part of fringes) (formerly part of 3083 600) - pound
3083 900	Not block-printed by hand (not in part of fringes) (formerly part of 3083 600) - pound
	Cotton quilts and bedspreads:
3085 700	Block-printed by hand (not in part of fringes) (formerly part of 3085 600) - Number and pound
3085 900	Not block-printed by hand (not in part of fringes) (formerly part of 3085 600) - Number and pound
4065 850	Tight barrelheads of soft wood (formerly part of 4280 990) - Number
9800 650	Bamboo pipe stems (formerly part of 9800 700) - Number

An announcement of the foregoing changes in Schedule A commodity classifications will be issued in a regular Public Bulletin.

EXPLANATION OF THE SAMPLING PROCEDURE FOR ESTIMATING LOW VALUED IMPORTS, 1960

A. CHANGE IN EXTENT OF SAMPLING

Beginning January 1958, the United States import statistics include, on a fully compiled basis, all imports individually valued at $100 or more reported on formal entries, and, on a one percent sample basis, all imports individually valued at less than $100 reported on formal entries as well as all imports reported on informal entries. (Informal entries, by definition, contain only items valued not more than $250.)

For the period January 1954-December 1957, imports individually valued $250 or less whether reported on formal immediate consumption or informal entries were excluded from the detailed commodity statistics but included in the over-all and summary totals on the basis of a five percent sample.

The September 1957 and January-March 1958 issues of the Foreign Trade Statistics Notes contain articles explaining the basis for the change in the sampling procedure.

B. INCREASE IN COVERAGE OF COMMODITY STATISTICS

Effective January 1958 the coverage of the detailed commodity statistics has been broadened to include on a fully compiled basis all formal entry imports individually valued $100-$250. The inclusion of data on these $100-$250 shipments will result in the publication of data for some commodities which will not be comparable to the published data for prior periods. In order to provide users of the statistics with some measure of change in comparability in the detailed commodity statistics supplemental data have been compiled on the dollar value of the $100-$250 formal entry transactions for the month of January 1958. (See the appendix at the end of the January 1958 issue of this report for further detail.)

C. DECREASE IN COVERAGE OF COMMODITY GROUP AND COMMODITY SUBGROUP TOTALS

Beginning January 1958 the estimated value for informal entry shipments and for under $100 formal entry shipments are summarized and included under arbitrary commodity number 9999 500 and arbitrary commodity subgroup 99 (990 effective January 1960) in group 9. Prior to January 1958 estimated values for shipments valued $250 or less whether reported on formal or informal entries were included in the appropriate commodity group and subgroup totals.

The change in sampling procedure and presentation of the estimated value for low value shipments effective January 1958 may result in understating the value of commodity group totals for other than group 9 by no more than about two percent. The inclusion of the estimated value for low value shipments in group 9 results in overstating the value of imports for that group by about 10-15 percent.

The commodity subgroup totals formerly presented in the body of this report are now shown separately in the table on page 7.

The extent of the undercounting in the value of the commodity subgroup totals as a result of the exclusion of the estimated low value shipments is no more than about five percent except for the subgroup covering, "Leather, rawhide and parchment manufactures;" "Fodders and feeds, n.e.s.;" "Scientific and professional instruments, apparatus, and supplies, n.e.s.;" "Books, maps, pictures, and other printed matter, n.e.s.;" all of which may be understated by about 10 to 15 percent.

Beginning January 1960, subgroup data are presented in terms of 3-digit subgroup classifications. The 3-digit subgroup numbers, replacing the 2-digit code numbers in effect during earlier periods, were established to provide for an increase in subgroup designations effective January 1960. An exact analysis of the probable undercounting of the ten new 3-digit subgroups, which replace four 2-digit subgroups, has not been made. However, the extent of undercounting in the value of the new subgroup totals as the result of exclusion of the estimated low value shipments is probably no more than five percent.

D. THE ESTIMATING PROCEDURE

For imports individually valued under $100 reported on formal immediate consumption entries and for imports reported on informal entries, a one percent sample of import entries is taken. Data are compiled from the sample and multiplied by 100 to obtain the estimates included in the statistics. These estimates are summarized and included in the statistics under:

1. Arbitrary Schedule A commodity number 9999 500 (the number of shipments included in the sample is shown in the quantity column)
2. Arbitrary Customs District code 99 as "Formal entry $1-$99, and informal entry $1-$250 shipments" (not shown in this report but published in FT 970-I)
3. Arbitrary commodity subgroup code 990 as "LOW VALUE DOLLAR EST" (not shown in the body of this report but published in FT 120)
4. Individual country codes as shown in Schedule C
5. The economic class for "Finished manufactures" (not shown in this report but published in FT 930 I and the Quarterly Summary of Foreign Commerce of the United States)

E. ACCURACY OF THE SAMPLE ESTIMATES REPORTED UNDER SCHEDULE A COMMODITY NUMBER 9999 500

When statistics are estimated on the basis of a sample, exact agreement with the results that would have been obtained from a complete tabulation is not expected. The extent to which estimated country codes in this report for the low valued imports (shipments of under $100 in value reported on formal entries and imports valued at less than $250 reported on informal entries) might not agree with a complete tabulation depends on the number of documents which fall in the sample. For each estimated figure in the report the number of documents in the sample on which the estimate was based is given.

As an example of the use of the table below, suppose an estimated value of $310,800 is based on 45 documents in the sample. Referring to the line "40-49," one notes the values $79,800 and $99,000. This means that the chances are better than 2 out of 3 that a complete tabulation would have resulted in a figure between $231,000 ($310,800 reduced by $79,800) and $409,800 ($310,800 increased by $99,000).

The table below indicates the degree of reliability to be attached to a specified value.

If the number of documents indicated from the sample is:	Then the chances are better than 2 out of 3 that a complete tabulation would have resulted in a value figure between	
	The specified estimate reduced by[1]	And the specified estimate increased by
0	0	21,840
1	9,840	27,240
2	15,360	31,320
3	19,440	34,560
4	22,800	37,560
5	25,680	40,080
6	28,320	42,480
7	30,720	44,760
8	32,880	46,800
9	35,040	48,720
10	36,960	50,640
11	38,760	52,440
12	40,560	54,120
13	42,360	55,680
14	43,920	57,240
15	45,480	58,800
16	47,040	60,240
17	48,480	61,680
18	49,920	63,120
19	51,360	64,440

If the number of documents indicated from the sample is:	Then the chances are better than 2 out of 3 that a complete tabulation would have resulted in a value figure between	
	The specified estimate reduced by[1]	And the specified estimate increased by
20-24	55,200	68,400
25-29	60,000	75,000
30-34	66,000	84,000
35-39	72,000	90,000
40-49	79,800	99,000
50-59	87,600	108,000
60-69	96,000	116,400
70-79	102,000	120,000
80-89	108,000	121,200
90-99	113,640	125,520
100-124	127,680	139,560
125-149	140,400	152,280
150-174	152,160	164,040
175-199	162,960	174,960
200-249	185,000	194,760
250-299	200,880	212,880
300-399	232,920	244,800
[2]400-499	261,120	272,000

[1]The minimum value of a complete tabulation for imports (both formal entries of individual items valued $1-$100 and informal entries valued at $1-$250) must be greater than 1/100 of the estimated amount shown in the report.

[2]If the number of documents in the sample is greater than 499, the sampling variability for the estimates of the low valued shipments will generally be less than 7 percent.

In the event a user desires to combine 2 or more figures which are estimated values, or which include estimated values, the variability of the combined total can be determined by merely adding the sample size for each estimated value and then referring to the line on the reliability table applicable to the combined sample size.

The omission of an estimate of the low valued shipments for any country indicates that there were no low valued import shipments appearing in the 1 percent document sample for the country. This does not necessarily mean that low valued imports were not made.

F. CHANGES IN COVERAGE AND COMPILING PROCEDURES REFLECTED IN RECENT YEAR'S ISSUES OF REPORT NO. FT 110 ARE SHOWN BELOW:

Year	Coverage and procedure
1952 and prior years	Fully compiled formal entry items by seven-digit commodity numbers. Informal entry items (valued $100 or less) excluded.
1953: January-June	Fully compiled formal entry items by seven-digit commodity numbers. Informal entry items (valued $100 or less) excluded.
July-December	Fully compiled formal entry items valued $100 and over by seven-digit commodity numbers. Estimated dollar value or formal entry items valued at less than $100 included in the total for commodity group 9 "Miscellaneous" and excluded from subgroup and other group totals as well as from the detailed commodity and commodity by country data. Informal entry items (valued $100 or less July and August and $250 or less September-December) excluded.
1954-1957	Fully compiled formal entry items valued $250 and over by seven-digit commodity numbers. Estimated dollar value of formal and informal entry items $250 and under distributed by, and included in the commodity group and subgroup totals.
1958	Fully compiled formal entry items valued $100 and over by seven-digit commodity numbers. Estimated dollar value of formal entry items under $100 and all informal entry items summarized under arbitrary commodity number 9999 500. The estimated value is included in the total for commodity group 9 "Miscellaneous" and excluded from subgroup and other group totals as well as from the detailed commodity and commodity by country data.

ABBREVIATIONS FOR UNITS OF QUANTITY

[When quantity is reported in two units for a commodity the second quantity is shown separately, without value, under the same commodity number and immediately following the data for the first unit of quantity (e.g. "Cotton cloth, unbleached," and "Manganese ore," Schedule A Commodity Numbers 3040 001-3047 999 and 6211 000 respectively)]

[1]Wine gallons if less than 100 proof, proof gallons if 100 proof or over.

(The commodity group and subgroup figures shown in this table may not be comparable with figures for periods prior to 1960 because of certain revisions in coverage and for periods prior to 1958 because of certain changes in sampling procedures and presentation of low value shipments. See page 6A of the January 1960 issue of this report for information on revised coverage; see page 5 of this report for explanation of sampling procedure.)

(The commodity group and subgroup figures shown in this table may not be comparable with figures for periods prior to 1960 because of certain revisions in coverage and for periods prior to 1958 because of certain changes in sampling procedures and presentation of low value shipments. See page 6A of the January 1960 issue of this report for information on revised coverage; see page 5 of this report for explanation of sampling procedure.)

SUGGESTED BRIEF CITATION

U. S. Bureau of the Census, United States Import Statistics, Report FT 110, October, 1960. Washington 25, D. C. January, 1961.

For sale by the Superintendent of Documents, U. S. Government Printing Office, Washington 25, D. C. and Department of Commerce Field Offices. Price 40 cents (single copy). Subscription price: $4; $1.25 additional for foreign mailing.

GENERAL EXPLANATION

COVERAGE

The import statistics include government as well as non-government shipments of merchandise from foreign countries to the United States. However, American goods returned by the United States armed forces for their own use are excluded. Shipments into the United States from Puerto Rico and from the United States territories and possessions and shipments between the territories and possessions and between Puerto Rico and the territories and possessions are not reported as United States imports, but imports into Puerto Rico from foreign countries are considered to be United States imports and are included in this report. Merchandise shipped under Customs custody through the United States in transit from one foreign country to another is not reported as imports. In general, the import statistics are a complete record of the physical movement of merchandise into the United States from foreign countries (except for intransit shipments), but there are some exclusions of items of relatively small importance in terms of total value such as gifts valued at less than $100.

Imports for consumption shown in this report consist of merchandise entered into United States comsumption channels, i.e., merchandise released from Customs custody immediately upon arrival, merchandise entered into bonded manufacturing warehouses (other than smelting and refining warehouses), merchandise withdrawn from bonded storage warehouse for release into domestic consumption channels, and imported ores and crude metals which have been processed in bonded smelting warehouse.

RELATED INFORMATION

Information is also compiled for general imports, which represent total arrivals of imported goods (except for in-transit shipments), i.e., merchandise released from Customs custody immediately upon arrival plus merchandise entered into bonded storage warehouse, bonded manufacturing warehouse, and bonded smelting and refining warehouse immediately upon arrival. General import figures covering total trade, country totals and Customs district totals are published monthly. General import commodity statistics are not published but are available for reference purposes.

Trade between the United States, Puerto Rico and United States possessions (not included as United States imports) is presented separately in Report No. FT 800. Statistics on the movement of in-transit merchandise arriving at or leaving the United States by vessel (not included in this report) are also compiled and presented in summary form in Report No. FT 985. In addition, transportation statistics (showing shipping weight as well as value information) are compiled covering that part of general imports of merchandise which arrives by vessel. Summary vessel transportation statistics for both imports and exports are presented in Report No. FT 985. A more complete description of the coverage and presentation of these separate shipping statistics will be found in the introduction to that report.

SOURCE OF INFORMATION

The source of information for all of the imports included in this report is the import entry (various Customs forms), which importers are required to file with Collectors of Customs for each shipment arriving in the United States. Importers are instructed to report value and country of origin information in accordance with the definitions given below.

VALUATION

The dollar value which should be shown on the import statistics is defined generally as the market value in the foreign country and should exclude the United States import duties, ocean freight and marine insurance. In actual practice only the values reported for imports subject to an ad valorem rate of duty (a percentage of the value) will tend to conform precisely to the vaulation definition. Imports subject to an ad valorem rate of duty account for only 10-15 percent of the total value of imports. For merchandise not subject to an ad valorem rate of duty (85-90 percent of imports), the reported values may not be in accordance with the above definition. For example, ocean freight may be inadvertently included in the values, values for shipments between allied firms may reflect arbitrary values, etc.

COMMODITY INFORMATION

Commodity information is summarized according to the classifications established in Schedule A, Statistical Classification of Commodities Imported into the United States, and is presented in the order of the numbered classifications in that Schedule. The Imports of Merchandise for Consumption by Subgroup table on page 7 of this report indicates the range of Schedule A commodity numbers covering related subgroups of commodities and will assist in locating in the report the statistics for particular commodities. For precise definition of the individual commodity classifications for which figures are presented, reference should be made to Schedule A. The commodity descriptions in this report are necessarily abbreviated to save printing costs and therefore, in many cases, they do not contain all of the qualifying information necessary to define clearly the commodity for which statistics are shown. The omission of a Schedule A commodity classification from this report indicates no imports of that commodity valued at more than $100 reported on formal entries. (See Section a of the "Explanation of the Sampling Procedure..." which follows this General Explanation.)

There are substantial difficulties to be faced in obtaining correct commodity classifications. While the more obvious errors in the statistical classifications of commodities by importers may be found during the processing of the statistics, a number of errors may go undetected, especially if the description of the merchandise shown on the entry is too general to specifically identify the proper commodity classification yet does not appear to be in contradiction with the commodity classification number assigned by the importer.

Effective January 1960, the initial reporting of imports is in terms of the 8-digit commodity classifications contained in United States Import Duties Annotated for Statistical Reporting. This publication presents the statistical reporting requirements as well as the tariff requirements in one volume in arrangement of the tariff paragraphs. The U.S.I.D. Annotated attempts to eliminate errors in initial reporting (and in the import statistics) occasioned by the difficulty of cross-classification between the tariff and statistical reporting requirements heretofore in different publications and in different arrangements.

COUNTRY OF ORIGIN

Though the country which should be reported in the statistics as the country of origin is defined as the country where the merchandise was grown, mined, or manufactured, the country actually shown in the statistics may in a number of cases represent some other country, such as the country of purchase, lading, or the country in which mixed lots of various origin are consolidated. This is particularly true of goods received from, but not originating in, merchanting or transshipment countries such as Hong Kong, Singapore, Netherlands, Belgium, etc.; in such cases the statistics may credit the shipments to such countries rather than the country of origin as defined. It follows, therefore, that imports from such merchanting or transshipment countries are likely to be overstated and imports from other countries correspondingly understated. Where it is known that a country is not the country of origin, the country of shipment is shown and footnoted in this report.

The geographic definition of countries reported are shown in Schedule C, Classification of Country Designations Used in Compiling the United States Foreign Trade Statistics. Country names which are abbreviated in this report to save space are shown in full in Schedule C, together with descriptions of the countries, adjacent provinces, territories, islands, or other areas considered a part of the country for statistical purposes. Schedule C is published as a part of Schedule A (see "Commodity Information" above). A separate edition of Schedule C is also available free upon request to the Bureau of the Census.

To save printing costs complete commodity by country of origin information is not shown in the monthly issues of this report. For each Schedule A commodity number, separate country of origin information is shown only for countries from which imports during the period covered by the report were $10,000 or more. Imports of that commodity originating in countries from which the amount shipped was less than $10,000 are presented as a combined total without country of origin detail and identified as "OTH CTY" (other countries). Information on imports originating in countries from which the amount shipped was less than $10,000 can be supplied upon request. A charge may be made to cover the cost of preparing this detailed information.

Countries are listed for each commodity in this report according to continents, in sequence within each continent from north to south and west to east, in accordance with Schedule C. The omission of a country name indicates no imports of that commodity from that country or imports of less than $10,000.

REVISIONS TO PREVIOUS MONTHS' REPORTS

Significant revisions to data published in this report for earlier months of the current and previous year are shown periodically at the back of this report. With the exception of very important changes, any revisions to data for earlier years are held for reflection in the figures to be published in Foreign Commerce and Navigation of the United States for that year.

SOURCES OF FURTHER INFORMATION ABOUT IMPORT STATISTICS

A complete discussion of the compilation procedures and coverage for import statistics will be found in the Foreword to the latest edition of Foreign Commerce and Navigation of the United States. (Copies are available for reference at public libraries.) Regular subscribers to FT reports are automatically supplied with copies of Foreign Trade Statistics Notes, a monthly publication containing information of value to users of foreign trade statistics (such as, changes in type of shipments covered by current statistics, unusual shipments, problems of valuation, classification, etc.). A catalog of United States Foreign Trade Statistical Publications is also available. Data in this report are available for reference purposes prior to the publication of the report or may be obtained in advance of publication on payment of the cost for a special report. Reports providing additional detail compiled but not published can be obtained on a cost basis. For free copies of the catalog or for further information regarding reference copies of tabulations or the availability of special reports, request should be made to the Bureau of the Census.

EXPLANATION OF THE SAMPLING PROCEDURE FOR ESTIMATING LOW VALUED IMPORTS, 1960

A. CHANGE IN EXTENT OF SAMPLING

Beginning January 1958, the United States import statistics include, on a fully compiled basis, all imports individually valued at $100 or more reported on formal entries, and, on a one percent sample basis, all imports individually valued at less than $100 reported on formal entries as well as all imports reported on informal entries. (Informal entries, by definition, contain only items valued not more than $250.)

For the period January 1954-December 1957, imports individually valued $250 or less whether reported on formal immediate consumption or informal entries were excluded from the detailed commodity statistics but included in the over-all and summary totals on the basis of a five percent sample.

The September 1957 and January-March 1958 issues of the Foreign Trade Statistics Notes contain articles explaining the basis for the change in the sampling procedure.

B. INCREASE IN COVERAGE OF COMMODITY STATISTICS

Effective January 1958 the coverage of the detailed commodity statistics has been broadened to include on a fully compiled basis all formal entry imports individually valued $100-$250. The inclusion of data on these $100-$250 shipments will result in the publication of data for some commodities which will not be comparable to the published data for prior periods. In order to provide users of the statistics with some measure of change in comparability in the detailed commodity statistics supplemental data have been compiled on the dollar value of the $100-$250 formal entry transactions for the month of January 1958. (See the appendix at the end of the January 1958 issue of this report for further detail.)

C. DECREASE IN COVERAGE OF COMMODITY GROUP AND COMMODITY SUBGROUP TOTALS

Beginning January 1958 the estimated value for informal entry shipments and for under $100 formal entry shipments are summarized and included under arbitrary commodity number 9999 500 and arbitrary commodity subgroup 99 (990 effective January 1960) in group 9. Prior to January 1958 estimated values for shipments valued $250 or less whether reported on formal or informal entries were included in the appropriate commodity group and subgroup totals.

The change in sampling procedure and presentation of the estimated value for low value shipments effective January 1958 may result in understating the value of commodity group totals for other than group 9 by no more than about two percent. The inclusion of the estimated value for low value shipments in group 9 results in overstating the value of imports for that group by about 10-15 percent.

The commodity subgroup totals formerly presented in the body of this report are now shown separately in the table on page 7.

The extent of the undercounting in the value of the commodity subgroup totals as a result of the exclusion of the estimated low value shipments is no more than about five percent except for the subgroup covering, "Leather, rawhide and parchment manufactures;" "Fodders and feeds, n.e.s.;" "Scientific and professional instruments, apparatus, and supplies, n.e.s.;" "Books, maps, pictures, and other printed matter, n.e.s.;" all of which may be understated by about 10 to 15 percent.

Beginning January 1960, subgroup data are presented in terms of 3-digit subgroup classifications. The 3-digit subgroup numbers, replacing the 2-digit code numbers in effect during earlier periods, were established to provide for an increase in subgroup designations effective January 1960. An exact analysis of the probable undercounting of the ten new 3-digit subgroups, which replace four 2-digit subgroups, has not been made. However, the extent of undercounting in the value of the new subgroup totals as the result of exclusion of the estimated low value shipments is probably no more than five percent.

D. THE ESTIMATING PROCEDURE

For imports individually valued under $100 reported on formal immediate consumption entries and for imports reported on informal entries, a one percent sample of import entries is taken. Data are compiled from the sample and multiplied by 100 to obtain the estimates included in the statistics. These estimates are summarized and included in the statistics under:

1. Arbitrary Schedule A commodity number 9999 500 (the number of shipments included in the sample is shown in the quantity column)
2. Arbitrary Customs District code 99 as "Formal entry $1-$99, and informal entry $1-$250 shipments" (not shown in this report but published in FT 970-I)
3. Arbitrary commodity subgroup code 990 as "LOW VALUE DOLLAR EST" (not shown in the body of this report but published in FT 120)
4. Individual country codes as shown in Schedule C
5. The economic class for "Finished manufactures" (not shown in this report but published in FT 930 I and the Quarterly Summary of Foreign Commerce of the United States)

E. ACCURACY OF THE SAMPLE ESTIMATES REPORTED UNDER SCHEDULE A COMMODITY NUMBER 9999 500

When statistics are estimated on the basis of a sample, exact agreement with the results that would have been obtained from a complete tabulation is not expected. The extent to which estimated country codes in this report for the low valued imports (shipments of under $100 in value reported on formal entries and imports valued at less than $250 reported on informal entries) might not agree with a complete tabulation depends on the number of documents which fall in the sample. For each estimated figure in the report the number of documents in the sample on which the estimate was based is given.

As an example of the use of the table below, suppose an estimated value of $310,800 is based on 45 documents in the sample. Referring to the line "40-49," one notes the values $79,800 and $99,000. This means that the chances are better than 2 out of 3 that a complete tabulation would have resulted in a figure between $231,000 ($310,800 reduced by $79,800) and $409,800 ($310,800 increased by $99,000).

The table below indicates the degree of reliability to be attached to a specified value.

If the number of documents indicated from the sample is:	Then the chances are better than 2 out of 3 that a complete tabulation would have resulted in a value figure between	
	The specified estimate reduced by[1]	And the specified estimate increased by
0	0	21,840
1	9,840	27,240
2	15,360	31,320
3	19,440	34,560
4	22,800	37,560
5	25,680	40,080
6	28,320	42,480
7	30,720	44,760
8	32,880	46,800
9	35,040	48,720
10	36,960	50,640
11	38,760	52,440
12	40,560	54,120
13	42,360	55,680
14	43,920	57,240
15	45,480	58,800
16	47,040	60,240
17	48,480	61,680
18	49,920	63,120
19	51,360	64,440

If the number of documents indicated from the sample is:	Then the chances are better than 2 out of 3 that a complete tabulation would have resulted in a value figure between	
	The specified estimate reduced by[1]	And the specified estimate increased by
20-24	55,200	68,400
25-29	60,000	75,000
30-34	66,000	84,000
35-39	72,000	90,000
40-49	79,800	99,000
50-59	87,600	108,000
60-69	96,000	116,400
70-79	102,000	120,000
80-89	108,000	121,200
90-99	113,640	125,520
100-124	127,680	139,560
125-149	140,400	152,280
150-174	152,160	164,040
175-199	162,960	174,960
200-249	183,000	194,760
250-299	200,880	212,880
300-399	232,920	244,800
[2]400-499	261,120	273,000

[1]The minimum value of a complete tabulation for imports (both formal entries of individual items valued $1-$100 and informal entries valued at $1-$250) must be greater than 1/100 of the estimated amount shown in the report.

[2]If the number of documents in the sample is greater than 499, the sampling variability for the estimates of the low valued shipments will generally be less than 7 percent.

In the event a user desires to combine 2 or more figures which are estimated values, or which include estimated values, the variability of the combined total can be determined by merely adding the sample size for each estimated value and then referring to the line on the reliability table applicable to the combined sample size.

The omission of an estimate of the low valued shipments for any country indicates that there were no low valued import shipments appearing in the 1 percent document sample for the country. This does not necessarily mean that low valued imports were not made.

F. CHANGES IN COVERAGE AND COMPILING PROCEDURES REFLECTED IN RECENT YEAR'S ISSUES OF REPORT NO. FT 110 ARE SHOWN BELOW:

Year	Coverage and procedure
1952 and prior years	Fully compiled formal entry items by seven-digit commodity numbers. Informal entry items (valued $100 or less) excluded.
1953: January-June	Fully compiled formal entry items by seven-digit commodity numbers. Informal entry items (valued $100 or less) excluded.
July-December	Fully compiled formal entry items valued $100 and over by seven-digit commodity numbers. Estimated dollar value or formal entry items valued at less than $100 included in the total for commodity group 9 "Miscellaneous" and excluded from subgroup and other group totals as well as from the detailed commodity and commodity by country data. Informal entry items (valued $100 or less July and August and $250 or less September-December) excluded.
1954-1957	Fully compiled formal entry items valued $250 and over by seven-digit commodity numbers. Estimated dollar value of formal and informal entry items $250 and under distributed by, and included in the commodity group and subgroup totals.
1958	Fully compiled formal entry items valued $100 and over by seven-digit commodity numbers. Estimated dollar value of formal entry items under $100 and all informal entry items summarized under arbitrary commodity number 9999 500. The estimated value is included in the total for commodity group 9 "Miscellaneous" and excluded from subgroup and other group totals as well as from the detailed commodity and commodity by country data.

ABBREVIATIONS FOR UNITS OF QUANTITY

[When quantity is reported in two units for a commodity the second quantity is shown separately, without value, under the same commodity number and immediately following the data for the first unit of quantity (e.g. "Cotton cloth, unbleached," and "Manganese ore," Schedule A Commodity Numbers 3040 001-3047 999 and 6211 000 respectively)]

SUGGESTED BRIEF CITATION

U. S. Bureau of the Census, United States Import Statistics, Report FT 110, November, 1960. Washington 25, D. C. February, 1961.

For sale by the Superintendent of Documents, U. S. Government Printing Office, Washington 25, D. C. and Department of Commerce Field Offices. Price 40 cents (single copy). Subscription price: $4; $1.25 additional for foreign mailing.

GENERAL EXPLANATION

COVERAGE

The import statistics include government as well as non-government shipments of merchandise from foreign countries to the United States. However, American goods returned by the United States armed forces for their own use are excluded. Shipments into the United States from Puerto Rico and from the United States territories and possessions and shipments between the territories and possessions and between Puerto Rico and the territories and possessions are not reported as United States imports, but imports into Puerto Rico from foreign countries are considered to be United States imports and are included in this report. Merchandise shipped under Customs custody through the United States in transit from one foreign country to another is not reported as imports. In general, the import statistics are a complete record of the physical movement of merchandise into the United States from foreign countries (except for intransit shipments), but there are some exclusions of items of relatively small importance in terms of total value such as gifts valued at less than $100.

Imports for consumption shown in this report consist of merchandise entered into United States consumption channels, i.e., merchandise released from Customs custody immediately upon arrival, merchandise entered into bonded manufacturing warehouses (other than smelting and refining warehouses), merchandise withdrawn from bonded storage warehouse for release into domestic consumption channels, and imported ores and crude metals which have been processed in bonded smelting warehouse.

RELATED INFORMATION

Information is also compiled for general imports, which represent total arrivals of imported goods (except for in-transit shipments), i.e., merchandise released from Customs custody immediately upon arrival plus merchandise entered into bonded storage warehouse, bonded manufacturing warehouse, and bonded smelting and refining warehouse immediately upon arrival. General import figures covering total trade, country totals and Customs district totals are published monthly. General import commodity statistics are not published but are available for reference purposes.

Trade between the United States, Puerto Rico and United States possessions (not included as United States imports) is presented separately in Report No. FT 800. Statistics on the movement of in-transit merchandise arriving at or leaving the United States by vessel (not included in this report) are also compiled and presented in summary form in Report No. FT 985. In addition, transportation statistics (showing shipping weight as well as value information) are compiled covering that part of general imports of merchandise which arrives by vessel. Summary vessel transportation statistics for both imports and exports are presented in Report No. FT 985. A more complete description of the coverage and presentation of these separate shipping statistics will be found in the introduction to that report.

SOURCE OF INFORMATION

The source of information for all of the imports included in this report is the import entry (various Customs forms), which importers are required to file with Collectors of Customs for each shipment arriving in the United States. Importers are instructed to report value and country of origin information in accordance with the definitions given below.

VALUATION

The dollar value which should be shown on the import statistics is defined generally as the market value in the foreign country and should exclude the United States import duties, ocean freight and marine insurance. In actual practice only the values reported for imports subject to an ad valorem rate of duty (a percentage of the value) will tend to conform precisely to the vaulation definition. Imports subject to an ad valorem rate of duty account for only 10-15 percent of the total value of imports. For merchandise not subject to an ad valorem rate of duty (85-90 percent of imports), the reported values may not be in accordance with the above definition. For example, ocean freight may be inadvertently included in the values, values for shipments between allied firms may reflect arbitrary values, etc.

COMMODITY INFORMATION

Commodity information is summarized according to the classifications established in Schedule A, Statistical Classification of Commodities Imported into the United States, and is presented in the order of the numbered classifications in that Schedule. The Imports of Merchandise for Consumption by Subgroup table on page 7 of this report indicates the range of Schedule A commodity numbers covering related subgroups of commodities and will assist in locating in the report the statistics for particular commodities. For precise definition of the individual commodity classifications for which figures are presented, reference should be made to Schedule A. The commodity descriptions in this report are necessarily abbreviated to save printing costs and therefore, in many cases, they do not contain all of the qualifying information necessary to define clearly the commodity for which statistics are shown. The omission of a Schedule A commodity classification from this report indicates no imports of that commodity valued at more than $100 reported on formal entries. (See Section a of the "Explanation of the Sampling Procedure..." which follows this General Explanation.)

There are substantial difficulties to be faced in obtaining correct commodity classifications. While the more obvious errors in the statistical classifications of commodities by importers may be found during the processing of the statistics, a number of errors may go undetected, especially if the description of the merchandise shown on the entry is too general to specifically identify the proper commodity classification yet does not appear to be in contradiction with the commodity classification number assigned by the importer.

Effective January 1960, the initial reporting of imports is in terms of the 8-digit commodity classifications contained in United States Import Duties Annotated for Statistical Reporting. This publication presents the statistical reporting requirements as well as the tariff requirements in one volume in arrangement of the tariff paragraphs. The U.S.I.D. Annotated attempts to eliminate errors in initial reporting (and in the import statistics) occasioned by the difficulty of cross-classification between the tariff and statistical reporting requirements heretofore in different publications and in different arrangements.

COUNTRY OF ORIGIN

Though the country which should be reported in the statistics as the country of origin is defined as the country where the merchandise was grown, mined, or manufactured, the country actually shown in the statistics may in a number of cases represent some other country, such as the country of purchase, lading, or the country in which mixed lots of various origin are consolidated. This is particularly true of goods received from, but not originating in, merchanting or transshipment countries such as Hong Kong, Singapore, Netherlands, Belgium, etc.; in such cases the statistics may credit the shipments to such countries rather than the country of origin as defined. It follows, therefore, that imports from such merchanting or transshipment countries are likely to be overstated and imports from other countries correspondingly understated. Where it is known that a country is not the country of origin, the country of shipment is shown and footnoted in this report.

The geographic definition of countries reported are shown in Schedule C, Classification of Country Designations Used in Compiling the United States Foreign Trade Statistics. Country names which are abbreviated in this report to save space are shown in full in Schedule C, together with descriptions of the countries, adjacent provinces, territories, islands, or other areas considered a part of the country for statistical purposes. Schedule C is published as a part of Schedule A (see "Commodity Information" above). A separate edition of Schedule C is also available free upon request to the Bureau of the Census.

To save printing costs complete commodity by country of origin information is not shown in the monthly issues of this report. For each Schedule A commodity number, separate country of origin information is shown only for countries from which imports during the period covered by the report were $10,000 or more. Imports of that commodity originating in countries from which the amount shipped was less than $10,000 are presented as a combined total without country of origin detail and identified as "OTH CTY" (other countries). Information on imports originating in countries from which the amount shipped was less than $10,000 can be supplied upon request. A charge may be made to cover the cost of preparing this detailed information.

Countries are listed for each commodity in this report according to continents, in sequence within each continent from north to south and west to east, in accordance with Schedule C. The omission of a country name indicates no imports of that commodity from that country or imports of less than $10,000.

REVISIONS TO PREVIOUS MONTHS' REPORTS

Significant revisions to data published in this report for earlier months of the current and previous year are shown periodically at the back of this report. With the exception of very important changes, any revisions to data for earlier years are held for reflection in the figures to be published in Foreign Commerce and Navigation of the United States for that year.

SOURCES OF FURTHER INFORMATION ABOUT IMPORT STATISTICS

A complete discussion of the compilation procedures and coverage for import statistics will be found in the Foreword to the latest edition of Foreign Commerce and Navigation of the United States. (Copies are available for reference at public libraries.) Regular subscribers to FT reports are automatically supplied with copies of Foreign Trade Statistics Notes, a monthly publication containing information of value to users of foreign trade statistics (such as, changes in type of shipments covered by current statistics, unusual shipments, problems of valuation, classification, etc.). A catalog of United States Foreign Trade Statistical Publications is also available. Data in this report are available for reference purposes prior to the publication of the report or may be obtained in advance of publication, on payment of the cost for a special report. Reports providing additional detail compiled but not published can be obtained on a cost basis. For free copies of the catalog or for further information regarding reference copies of tabulations or the availability of special reports, request should be made to the Bureau of the Census.

EXPLANATION OF THE SAMPLING PROCEDURE FOR ESTIMATING LOW VALUED IMPORTS, 1960

A. CHANGE IN EXTENT OF SAMPLING

Beginning January 1958, the United States import statistics include, on a fully compiled basis, all imports individually valued at $100 or more reported on formal entries, and, on a one percent sample basis, all imports individually valued at less than $100 reported on formal entries as well as all imports reported on informal entries. (Informal entries, by definition, contain only items valued not more than $250.)

For the period January 1954-December 1957, imports individually valued $250 or less whether reported on formal immediate consumption or informal entries were excluded from the detailed commodity statistics but included in the over-all and summary totals on the basis of a five percent sample.

The September 1957 and January-March 1958 issues of the Foreign Trade Statistics Notes contain articles explaining the basis for the change in the sampling procedure.

B. INCREASE IN COVERAGE OF COMMODITY STATISTICS

Effective January 1958 the coverage of the detailed commodity statistics has been broadened to include on a fully compiled basis all formal entry imports individually valued $100-$250. The inclusion of data on these $100-$250 shipments will result in the publication of data for some commodities which will not be comparable to the published data for prior periods. In order to provide users of the statistics with some measure of change in comparability in the detailed commodity statistics supplemental data have been compiled on the dollar value of the $100-$250 formal entry transactions for the month of January 1958. (See the appendix at the end of the January 1958 issue of this report for further detail.)

C. DECREASE IN COVERAGE OF COMMODITY GROUP AND COMMODITY SUBGROUP TOTALS

Beginning January 1958 the estimated value for informal entry shipments and for under $100 formal entry shipments are summarized and included under arbitrary commodity number 9999 500 and arbitrary commodity subgroup 99 (990 effective January 1960) in group 9. Prior to January 1958 estimated values for shipments valued $250 or less whether reported on formal or informal entries were included in the appropriate commodity group and subgroup totals.

The change in sampling procedure and presentation of the estimated value for low value shipments effective January 1958 may result in understating the value of commodity group totals for other than group 9 by no more than about two percent. The inclusion of the estimated value for low value shipments in group 9 results in overstating the value of imports for that group by about 10-15 percent.

The commodity subgroup totals formerly presented in the body of this report are now shown separately in the table on page 7.

The extent of the undercounting in the value of the commodity subgroup totals as a result of the exclusion of the estimated low value shipments is no more than about five percent except for the subgroup covering, "Leather, rawhide and parchment manufactures;" "Fodders and feeds, n.e.s.;" "Scientific and professional instruments, apparatus, and supplies, n.e.s.;" "Books, maps, pictures, and other printed matter, n.e.s.;" all of which may be understated by about 10 to 15 percent.

Beginning January 1960, subgroup data are presented in terms of 3-digit subgroup classifications. The 3-digit subgroup numbers, replacing the 2-digit code numbers in effect during earlier periods, were established to provide for an increase in subgroup designations effective January 1960. An exact analysis of the probable undercounting of the ten new 3-digit subgroups, which replace four 2-digit subgroups, has not been made. However, the extent of undercounting in the value of the new subgroup totals as the result of exclusion of the estimated low value shipments is probably no more than five percent.

D. THE ESTIMATING PROCEDURE

For imports individually valued under $100 reported on formal immediate consumption entries and for imports reported on informal entries, a one percent sample of import entries is taken. Data are compiled from the sample and multiplied by 100 to obtain the estimates included in the statistics. These estimates are summarized and included in the statistics under:

1. Arbitrary Schedule A commodity number 9999 500 (the number of shipments included in the sample is shown in the quantity column)
2. Arbitrary Customs District code 99 as "Formal entry $1-$99, and informal entry $1-$250 shipments" (not shown in this report but published in FT 970-I)
3. Arbitrary commodity subgroup code 990 as "LOW VALUE DOLLAR EST" (not shown in the body of this report but published in FT 120)
4. Individual country codes as shown in Schedule C
5. The economic class for "Finished manufactures" (not shown in this report but published in FT 930 I and the Quarterly Summary of Foreign Commerce of the United States)

E. ACCURACY OF THE SAMPLE ESTIMATES REPORTED UNDER SCHEDULE A COMMODITY NUMBER 9999 500

When statistics are estimated on the basis of a sample, exact agreement with the results that would have been obtained from a complete tabulation is not expected. The extent to which estimated country codes in this report for the low valued imports (shipments of under $100 in value reported on formal entries and imports valued at less than $250 reported on informal entries) might not agree with a complete tabulation depends on the number of documents which fall in the sample. For each estimated figure in the report the number of documents in the sample on which the estimate was based is given.

As an example of the use of the table below, suppose an estimated value of $310,800 is based on 45 documents in the sample. Referring to the line "40-49," one notes the values $79,800 and $99,000. This means that the chances are better than 2 out of 3 that a complete tabulation would have resulted in a figure between $231,000 ($310,800 reduced by $79,800) and $409,800 ($310,800 increased by $99,000).

The table below indicates the degree of reliability to be attached to a specified value.

If the number of documents indicated from the sample is:	Then the chances are better than 2 out of 3 that a complete tabulation would have resulted in a value figure between	
	The specified estimate reduced by[1]	And the specified estimate increased by
0	0	21,840
1	9,840	27,240
2	15,360	31,320
3	19,440	34,560
4	22,800	37,560
5	25,680	40,080
6	28,320	42,480
7	30,720	44,760
8	32,880	46,800
9	35,040	48,720
10	36,960	50,640
11	38,760	52,440
12	40,560	54,120
13	42,360	55,680
14	43,920	57,240
15	45,480	58,800
16	47,040	60,240
17	48,480	61,680
18	49,920	63,120
19	51,360	64,440

If the number of documents indicated from the sample is:	Then the chances are better than 2 out of 3 that a complete tabulation would have resulted in a value figure between	
	The specified estimate reduced by[1]	And the specified estimate increased by
20-24	55,200	68,400
25-29	60,000	75,000
30-34	66,000	84,000
35-39	72,000	90,000
40-49	79,800	99,000
50-59	87,600	108,000
60-69	96,000	116,400
70-79	102,000	120,000
80-89	108,000	121,200
90-99	113,640	125,520
100-124	127,680	139,560
125-149	140,400	152,280
150-174	152,160	164,040
175-199	162,960	174,960
200-249	183,000	194,760
250-299	200,880	212,880
300-399	232,920	244,800
[2]400-499	261,120	273,000

[1]The minimum value of a complete tabulation for imports (both formal entries of individual items valued $1-$100 and informal entries valued at $1-$250) must be greater than 1/100 of the estimated amount shown in the report.

[2]If the number of documents in the sample is greater than 499, the sampling variability for the estimates of the low valued shipments will generally be less than 7 percent.

In the event a user desires to combine 2 or more figures which are estimated values, or which include estimated values, the variability of the combined total can be determined by merely adding the sample size for each estimated value and then referring to the line on the reliability table applicable to the combined sample size.

The omission of an estimate of the low valued shipments for any country indicates that there were no low valued import shipments appearing in the 1 percent document sample for the country. This does not necessarily mean that low valued imports were not made.

F. CHANGES IN COVERAGE AND COMPILING PROCEDURES REFLECTED IN RECENT YEAR'S ISSUES OF REPORT NO. FT 110 ARE SHOWN BELOW:

Year	Coverage and procedure
1952 and prior years	Fully compiled formal entry items by seven-digit commodity numbers. Informal entry items (valued $100 or less) excluded.
1953: January-June	Fully compiled formal entry items by seven-digit commodity numbers. Informal entry items (valued $100 or less) excluded.
July-December	Fully compiled formal entry items valued $100 and over by seven-digit commodity numbers. Estimated dollar value or formal entry items valued at less than $100 included in the total for commodity group 9 "Miscellaneous" and excluded from subgroup and other group totals as well as from the detailed commodity and commodity by country data. Informal entry items (valued $100 or less July and August and $250 or less September-December) excluded.
1954-1957	Fully compiled formal entry items valued $250 and over by seven-digit commodity numbers. Estimated dollar value of formal and informal entry items $250 and under distributed by, and included in the commodity group and subgroup totals.
1958	Fully compiled formal entry items valued $100 and over by seven-digit commodity numbers. Estimated dollar value of formal entry items under $100 and all informal entry items summarized under arbitrary commodity number 9999 500. The estimated value is included in the total for commodity group 9 "Miscellaneous" and excluded from subgroup and other group totals as well as from the detailed commodity and commodity by country data.

ABBREVIATIONS FOR UNITS OF QUANTITY

[When quantity is reported in two units for a commodity the second quantity is shown separately, without value, under the same commodity number and immediately following the data for the first unit of quantity (e.g. "Cotton cloth, unbleached," and "Manganese ore," Schedule A Commodity Numbers 3040 001-3047 999 and 6211 000 respectively)]

SUGGESTED BRIEF CITATION

U. S. Bureau of the Census, United States Import Statistics, Report FT 110, December, 1960. Washington 25, D. C. March, 1961.

For sale by the Superintendent of Documents, U. S. Government Printing Office, Washington 25, D. C. and Department of Commerce Field Offices. Price 40 cents (single copy). Subscription price: $4; $1.25 additional for foreign mailing.

GENERAL EXPLANATION

COVERAGE

The import statistics include government as well as non-government shipments of merchandise from foreign countries to the United States. However, American goods returned by the United States armed forces for their own use are excluded. Shipments into the United States from Puerto Rico and from the United States territories and possessions and shipments between the territories and possessions and between Puerto Rico and the territories and possessions are not reported as United States imports, but imports into Puerto Rico from foreign countries are considered to be United States imports and are included in this report. Merchandise shipped under Customs custody through the United States in transit from one foreign country to another is not reported as imports. In general, the import statistics are a complete record of the physical movement of merchandise into the United States from foreign countries (except for intransit shipments), but there are some exclusions of items of relatively small importance in terms of total value such as gifts valued at less than $100.

Imports for consumption shown in this report consist of merchandise entered into United States comsumption channels, i.e., merchandise released from Customs custody immediately upon arrival, merchandise entered into bonded manufacturing warehouses (other than smelting and refining warehouses), merchandise withdrawn from bonded storage warehouse for release into domestic consumption channels, and imported ores and crude metals which have been processed in bonded smelting warehouse.

RELATED INFORMATION

Information is also compiled for general imports, which represent total arrivals of imported goods (except for in-transit shipments), i.e., merchandise released from Customs custody immediately upon arrival plus merchandise entered into bonded storage warehouse, bonded manufacturing warehouse, and bonded smelting and refining warehouse immediately upon arrival. General import figures covering total trade, country totals and Customs district totals are published monthly. General import commodity statistics are not published but are available for reference purposes.

Trade between the United States, Puerto Rico and United States possessions (not included as United States imports) is presented separately in Report No. FT 800. Statistics on the movement of in-transit merchandise arriving at or leaving the United States by vessel (not included in this report) are also compiled and presented in summary form in Report No. FT 985. In addition, transportation statistics (showing shipping weight as well as value information) are compiled covering that part of general imports of merchandise which arrives by vessel. Summary vessel transportation statistics for both imports and exports are presented in Report No. FT 985. A more complete description of the coverage and presentation of these separate shipping statistics will be found in the introduction to that report.

SOURCE OF INFORMATION

The source of information for all of the imports included in this report is the import entry (various Customs forms), which importers are required to file with Collectors of Customs for each shipment arriving in the United States. Importers are instructed to report value and country of origin information in accordance with the definitions given below.

VALUATION

The dollar value which should be shown on the import statistics is defined generally as the market value in the foreign country and should exclude the United States import duties, ocean freight and marine insurance. In actual practice only the values reported for imports subject to an ad valorem rate of duty (a percentage of the value) will tend to conform precisely to the vaulation definition. Imports subject to an ad valorem rate of duty account for only 10-15 percent of the total value of imports. For merchandise not subject to an ad valorem rate of duty (85-90 percent of imports), the reported values may not be in accordance with the above definition. For example, ocean freight may be inadvertently included in the values, values for shipments between allied firms may reflect arbitrary values, etc.

COMMODITY INFORMATION

Commodity information is summarized according to the classifications established in Schedule A, Statistical Classification of Commodities Imported into the United States, and is presented in the order of the numbered classifications in that Schedule. The Imports of Merchandise for Consumption by Subgroup table on page 7 of this report indicates the range of Schedule A commodity numbers covering related subgroups of commodities and will assist in locating in the report the statistics for particular commodities. For precise definition of the individual commodity classifications for which figures are presented, reference should be made to Schedule A. The commodity descriptions in this report are necessarily abbreviated to save printing costs and therefore, in many cases, they do not contain all of the qualifying information necessary to define clearly the commodity for which statistics are shown. The omission of a Schedule A commodity classification from this report indicates no imports of that commodity valued at more than $100 reported on formal entries. (See Section a of the "Explanation of the Sampling Procedure..." which follows this General Explanation.)

There are substantial difficulties to be faced in obtaining correct commodity classifications. While the more obvious errors in the statistical classifications of commodities by importers may be found during the processing of the statistics, a number of errors may go undetected, especially if the description of the merchandise shown on the entry is too general to specifically identify the proper commodity classification yet does not appear to be in contradiction with the commodity classification number assigned by the importer.

Effective January 1960, the initial reporting of imports is in terms of the 8-digit commodity classifications contained in United States Import Duties Annotated for Statistical Reporting. This publication presents the statistical reporting requirements as well as the tariff requirements in one volume in arrangement of the tariff paragraphs. The U.S.I.D. Annotated attempts to eliminate errors in initial reporting (and in the import statistics) occasioned by the difficulty of cross-classification between the tariff and statistical reporting requirements heretofore in different publications and in different arrangements.

COUNTRY OF ORIGIN

Though the country which should be reported in the statistics as the country of origin is defined as the country where the merchandise was grown, mined, or manufactured, the country actually shown in the statistics may in a number of cases represent some other country, such as the country of purchase, lading, or the country in which mixed lots of various origin are consolidated. This is particularly true of goods received from, but not originating in, merchanting or transshipment countries such as Hong Kong, Singapore, Netherlands, Belgium, etc.; in such cases the statistics may credit the shipments to such countries rather than the country of origin as defined. It follows, therefore, that imports from such merchanting or transshipment countries are likely to be overstated and imports from other countries correspondingly understated. Where it is known that a country is not the country of origin, the country of shipment is shown and footnoted in this report.

The geographic definition of countries reported are shown in Schedule C, Classification of Country Designations Used in Compiling the United States Foreign Trade Statistics. Country names which are abbreviated in this report to save space are shown in full in Schedule C, together with descriptions of the countries, adjacent provinces, territories, islands, or other areas considered a part of the country for statistical purposes. Schedule C is published as a part of Schedule A (see "Commodity Information" above). A separate edition of Schedule C is also available free upon request to the Bureau of the Census.

To save printing costs complete commodity by country of origin information is not shown in the monthly issues of this report. For each Schedule A commodity number, separate country of origin information is shown only for countries from which imports during the period covered by the report were $10,000 or more. Imports of that commodity originating in countries from which the amount shipped was less than $10,000 are presented as a combined total without country of origin detail and identified as "OTH CTY" (other countries). Information on imports originating in countries from which the amount shipped was less than $10,000 can be supplied upon request. A charge may be made to cover the cost of preparing this detailed information.

Countries are listed for each commodity in this report according to continents, in sequence within each continent from north to south and west to east, in accordance with Schedule C. The omission of a country name indicates no imports of that commodity from that country or imports of less than $10,000.

REVISIONS TO PREVIOUS MONTHS' REPORTS

Significant revisions to data published in this report for earlier months of the current and previous year are shown periodically at the back of this report. With the exception of very important changes, any revisions to data for earlier years are held for reflection in the figures to be published in Foreign Commerce and Navigation of the United States for that year.

SOURCES OF FURTHER INFORMATION ABOUT IMPORT STATISTICS

A complete discussion of the compilation procedures and coverage for import statistics will be found in the Foreword to the latest edition of Foreign Commerce and Navigation of the United States. (Copies are available for reference at public libraries.) Regular subscribers to FT reports are automatically supplied with copies of Foreign Trade Statistics Notes, a monthly publication containing information of value to users of foreign trade statistics (such as, changes in type of shipments covered by current statistics, unusual shipments, problems of valuation, classification, etc.). A catalog of United States Foreign Trade Statistical Publications is also available. Data in this report are available for reference purposes prior to the publication of the report or may be obtained in advance of publication on payment of the cost for a special report. Reports providing additional detail compiled but not published can be obtained on a cost basis. For free copies of the catalog or for further information regarding reference copies of tabulations or the availability of special reports, request should be made to the Bureau of the Census.

SPECIAL NOTICE

DISCONTINUANCE OF FOREIGN TRADE STATISTICS NOTES

The separate publication Foreign Trade Statistics Notes, which has carried supplementary information and explanations of interest to users of foreign trade statistics, has been discontinued. Instead, any special notes prepared for the information or guidance of users will be carried in a current issue of the statistical publications themselves, or in special announcements mailed with the regular publications. Copies will be attached to reference copies of tabulations, where appropriate.

Announcements of new or renewed special foreign trade reports contracted for on a cost basis by users will be shown in the first available issues of Reports No. FT-110 and FT-410. Lists of such special reports will also continue to appear quarterly in the Catalog of Census Publications. Subscriptions to the Catalog may be made, at a cost of $1.25 for 4 consecutive issues including 12 issues of the monthly Supplement (75 cents additional for foreign mailing), through the Government Printing Office. The policy with respect to the furnishing of cost reports, and with respect to cost-sharing arrangements for reports desired by more than one user, was outlined in the April 1958 issue of Foreign Trade Statistics Notes, and is still in effect. Reprints will be furnished upon request. Announcements of any changes in the policy will be made in a current issue of the statistical reports.

Collectors Bulletins listing additional items to be included in the Schedule B commodity classifications, formerly carried in the Foreign Trade Statistics Notes, will also be included in Report No. FT-410.

Users who do not keep permanent files of foreign trade statistical reports should, before disposing of individual issues, clip and retain for future reference any notes which are of lasting interest or which will be needed for future reference.

EXPLANATION OF THE SAMPLING PROCEDURE FOR ESTIMATING LOW VALUED IMPORTS, 1960

A. CHANGE IN EXTENT OF SAMPLING

Beginning January 1958, the United States import statistics include, on a fully compiled basis, all imports individually valued at $100 or more reported on formal entries, and, on a one percent sample basis, all imports individually valued at less than $100 reported on formal entries as well as all imports reported on informal entries. (Informal entries, by definition, contain only items valued not more than $250.)

For the period January 1954-December 1957, imports individually valued $250 or less whether reported on formal immediate consumption or informal entries were excluded from the detailed commodity statistics but included in the over-all and summary totals on the basis of a five percent sample.

The September 1957 and January-March 1958 issues of the Foreign Trade Statistics Notes contain articles explaining the basis for the change in the sampling procedure.

B. INCREASE IN COVERAGE OF COMMODITY STATISTICS

Effective January 1958 the coverage of the detailed commodity statistics has been broadened to include on a fully compiled basis all formal entry imports individually valued $100-$250. The inclusion of data on these $100-$250 shipments will result in the publication of data for some commodities which will not be comparable to the published data for prior periods. In order to provide users of the statistics with some measure of change in comparability in the detailed commodity statistics supplemental data have been compiled on the dollar value of the $100-$250 formal entry transactions for the month of January 1958. (See the appendix at the end of the January 1958 issue of this report for further detail.)

C. DECREASE IN COVERAGE OF COMMODITY GROUP AND COMMODITY SUBGROUP TOTALS

Beginning January 1958 the estimated value for informal entry shipments and for under $100 formal entry shipments are summarized and included under arbitrary commodity number 9999 500 and arbitrary commodity subgroup 99 (990 effective January 1960) in group 9. Prior to January 1958 estimated values for shipments valued $250 or less whether reported on formal or informal entries were included in the appropriate commodity group and subgroup totals.

The change in sampling procedure and presentation of the estimated value for low value shipments effective January 1958 may result in understating the value of commodity group totals for other than group 9 by no more than about two percent. The inclusion of the estimated value for low value shipments in group 9 results in overstating the value of imports for that group by about 10-15 percent.

The commodity subgroup totals formerly presented in the body of this report are now shown separately in the table on page 7.

The extent of the undercounting in the value of the commodity subgroup totals as a result of the exclusion of the estimated low value shipments is no more than about five percent except for the subgroup covering, "Leather, rawhide and parchment manufactures;" "Fodders and feeds, n.e.s.;" "Scientific and professional instruments, apparatus, and supplies, n.e.s.;" "Books, maps, pictures, and other printed matter, n.e.s.;" all of which may be understated by about 10 to 15 percent.

Beginning January 1960, subgroup data are presented in terms of 3-digit subgroup classifications. The 3-digit subgroup numbers, replacing the 2-digit code numbers in effect during earlier periods, were established to provide for an increase in subgroup designations effective January 1960. An exact analysis of the probable undercounting of the ten new 3-digit subgroups, which replace four 2-digit subgroups, has not been made. However, the extent of undercounting in the value of the new subgroup totals as the result of exclusion of the estimated low value shipments is probably no more than five percent.

D. THE ESTIMATING PROCEDURE

For imports individually valued under $100 reported on formal immediate consumption entries and for imports reported on informal entries, a one percent sample of import entries is taken. Data are compiled from the sample and multiplied by 100 to obtain the estimates included in the statistics. These estimates are summarized and included in the statistics under:

1. Arbitrary Schedule A commodity number 9999 500 (the number of shipments included in the sample is shown in the quantity column)

2. Arbitrary Customs District code 99 as "Formal entry $1-$99, and informal entry $1-$250 shipments" (not shown in this report but published in FT 970-I)

3. Arbitrary commodity subgroup code 990 as "LOW VALUE DOLLAR EST" (not shown in the body of this report but published in FT 120)

4. Individual country codes as shown in Schedule C

5. The economic class for "Finished manufactures" (not shown in this report but published in FT 930 I and the Quarterly Summary of Foreign Commerce of the United States)

E. ACCURACY OF THE SAMPLE ESTIMATES REPORTED UNDER SCHEDULE A COMMODITY NUMBER 9999 500

When statistics are estimated on the basis of a sample, exact agreement with the results that would have been obtained from a complete tabulation is not expected. The extent to which estimated country codes in this report for the low valued imports (shipments of under $100 in value reported on formal entries and imports valued at less than $250 reported on informal entries) might not agree with a complete tabulation depends on the number of documents which fall in the sample. For each estimated figure in the report the number of documents in the sample on which the estimate was based is given.

As an example of the use of the table below, suppose an estimated value of $310,800 is based on 45 documents in the sample. Referring to the line "40-49," one notes the values $79,800 and $99,000. This means that the chances are better than 2 out of 3 that a complete tabulation would have resulted in a figure between $231,000 ($310,800 reduced by $79,800) and $409,800 ($310,800 increased by $99,000).

The table below indicates the degree of reliability to be attached to a specified value.

If the number of documents indicated from the sample is:	Then the chances are better than 2 out of 3 that a complete tabulation would have resulted in a value figure between	
	The specified estimate reduced by[1]	And the specified estimate increased by
0	0	21,840
1	9,840	27,240
2	15,360	31,320
3	19,440	34,560
4	22,800	37,560
5	25,680	40,080
6	28,320	42,480
7	30,720	44,760
8	32,880	46,800
9	35,040	48,720
10	36,960	50,640
11	38,760	52,440
12	40,560	54,120
13	42,360	55,680
14	43,920	57,240
15	45,480	58,800
16	47,040	60,240
17	48,480	61,680
18	49,920	63,120
19	51,360	64,440

If the number of documents indicated from the sample is:	Then the chances are better than 2 out of 3 that a complete tabulation would have resulted in a value figure between	
	The specified estimate reduced by[1]	And the specified estimate increased by
20-24	55,200	68,400
25-29	60,000	75,000
30-34	66,000	84,000
35-39	72,000	90,000
40-49	79,800	99,000
50-59	87,600	108,000
60-69	96,000	116,400
70-79	102,000	120,000
80-89	108,000	121,200
90-99	113,640	125,520
100-124	127,680	139,560
125-149	140,400	152,280
150-174	152,160	164,040
175-199	162,960	174,960
200-249	186,000	194,760
250-299	200,880	212,880
300-399	232,920	244,800
[2]400-499	261,120	272,000

[1]The minimum value of a complete tabulation for imports (both formal entries of individual items valued $1-$100 and informal entries valued at $1-$250) must be greater than 1/100 of the estimated amount shownin the report.

[2]If the number of documents in the sample is greater than 499, the sampling variability for the estimates of the low valued shipments will generally be less than 7 percent.

In the event a user desires to combine 2 or more figures which are estimated values, or which include estimated values, the variability of the combined total can be determined by merely adding the sample size for each estimated value and then referring to the line on the reliability table applicable to the combined sample size.

The omission of an estimate of the low valued shipments for any country indicates that there were no low valued import shipments appearing in the 1 percent document sample for the country. This does not necessarily mean that low valued imports were not made.

F. CHANGES IN COVERAGE AND COMPILING PROCEDURES REFLECTED IN RECENT YEAR'S ISSUES OF REPORT NO. FT 110 ARE SHOWN BELOW:

Year	Coverage and procedure
1952 and prior years	Fully compiled formal entry items by seven-digit commodity numbers.
	Informal entry items (valued $100 or less) excluded.
1953: January-June	Fully compiled formal entry items by seven-digit commodity numbers.
	Informal entry items (valued $100 or less) excluded.
July-December	Fully compiled formal entry items valued $100 and over by seven-digit commodity numbers.
	Estimated dollar value or formal entry items valued at less than $100 included in the total for commodity group 9 "Miscellaneous" and excluded from subgroup and other group totals as well as from the detailed commodity and commodity by country data.
	Informal entry items (valued $100 or less July and August and $250 or less September-December) excluded.
1954-1957	Fully compiled formal entry items valued $250 and over by seven-digit commodity numbers.
	Estimated dollar value of formal and informal entry items $250 and under distributed by, and included in the commodity group and subgroup totals.
1958	Fully compiled formal entry items valued $100 and over by seven-digit commodity numbers.
	Estimated dollar value of formal entry items under $100 and all informal entry items summarized under arbitrary commodity number 9999 500. The estimated value is included in the total for commodity group 9 "Miscellaneous" and excluded from subgroup and other group totals as well as from the detailed commodity and commodity by country data.

ABBREVIATIONS FOR UNITS OF QUANTITY

[When quantity is reported in two units for a commodity the second quantity is shown separately, without value, under the same commodity number and immediately following the data for the first unit of quantity (e.g. "Cotton cloth, unbleached," and "Manganese ore," Schedule A Commodity Numbers 3040 001-3047 999 and 6211 000 respectively)]

Abbrev.	Description	Abbrev.	Description	Abbrev.	Description	Abbrev.	Description

[1]Wine gallons if less than 100 proof, proof gallons if 100 proof or over.

(The commodity group and subgroup figures shown in this table may not be comparable with figures for periods prior to 1960 because of certain revisions in coverage and for periods prior to 1958 because of certain changes in sampling procedures and presentation of low value shipments. See page 6A of the January 1960 issue of this report for information on revised coverage; see page 5 of this report for explanation of sampling procedure.)
